# Course Descriptions

## **COURSE #1: CANADIAN BUSINESS LAW**

**Instructor: Germán Morales Farah**

The objective of this course is to provide students with an introduction to business law in Canada, including Contracts, Torts, and Business Organizations. In addition to traditional style lectures, the course is designed for students to critically engage with the material through participation in class exercises.

Students will be provided with a basic introduction to the law of the corporation, key alternative ways of forming a business and types of liability associated with these entities. Through this course, students will gain an understanding of corporate structures. In addition, we will examine the role of the corporation in contemporary global society by looking at policy considerations relating to corporate social responsibility as well as other ethical and theoretical considerations relevant to the broader business environment, with a particular focus on cross-border business relationships and transactions.

## **COURSE #2: LEGAL ENGLISH FOR BUSINESS LAW**

**Instructor: Yuliya Miakisheva**

This course functions as a companion to the Business Law course, providing opportunities for students to master vocabulary and language style for business law contexts. This highly interactive course will provide opportunities to practise speaking, listening, reading, and writing, including practical and academic exercises. Students will meet law graduates working in business law and participate in simulation exercises. On completion of this program, students will feel more comfortable and confident reading business law materials, engaging in correspondence in legal English, and discussing business law matters in English.

# Course Evaluation

## **EACH COURSE WILL BE SEPARATELY EVALUATED AS FOLLOWS:**

1. **30% - Student participation/commentaries:** To get full participation marks, students are expected to attend class, do the readings, come prepared to discuss them, and actively take part in class discussions. They are also expected to produce two short commentary pieces on the readings during each course (based on deadlines advertised by the professor at the beginning of the first day of class).
2. **70% - Take-home exam:** After the end of the program, students will be assigned two take-home examinations, to be submitted within three weeks following the conclusion of the program. All materials covered in the courses may be subject to examination.
